Voiceover:

A System Bet is a pre-configured bet of 3 to 8 pick,s where your wager amount is automatically multiplied.

Unlike a standard Parlay, where every pick needs to be correct, a System Bet can payout even if some of the picks lose.

Video: The cursor moves to the left hand navigation panel and selects Baseball, then MLB. Three picks are made and added to the betslip on the right-hand side.

Voiceover:

When you add 3 or more picks to your betslip, you'll get the option to wager on different System Bets.

All you have to do is enter one wager amount in a System Bet's field, and it will automatically multiply that amount by the number of picks it contains.

Video: A \$10.00 wager amount is entered into the Trixie bet. The cursor then clicks the Player Icon and a drop down menu appears to highlight My Playsmart Tools.

Voiceover:

For example: once you have 3 picks in your betslip, you'll get the option to make a Trixie System Bet. A Trixie multiplies your wager four times, so if you wager \$10 your total cost would be \$40.

Each System Bet multiplies differently. Double-check your total wager amount when choosing a System Bet and consider setting your Sports Spend Limit.

This will prevent any System Bet from taking you over your budget.

Video: The Clear All button highlights as the cursor hovers over it. The cursor clicks the Place Bet button and confirms the bet. The cursor selects the Open Bets tab to show the new bet and then the Settled Bets tab.

Voiceover:

If you change your mind and want to make a new betslip, just click Clear All.

Once you're happy with your bet, click Place Bet.

You'll have 30 seconds to confirm your bet. If you don't confirm, it won't be placed!

Once your bet has been placed, you'll see it under Open Bets.

Bets cannot be canceled, reversed or undone once confirmed.

As long as a bet is open, you may have the option to Cash Out. Any bets that are final will appear under Settled Bets.
