TOOLS TO PLAY

TAP 'N PLAY CABINET BINGO

THE OBJECT OF THE GAME

TAP 'N PLAY Cabinet Bingo games are fun and easy to play single player games that give you the chance to win instant cash prizes and progressive jackpots.

All results are based on a bingo game outcome. Match a bingo pattern available in that game to win the corresponding prize. Entertainment display is an animation of the bingo game results and for amusement only.

5 STEPS TO PLAY

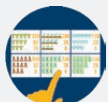

1. START WITH A GAME PLAN

This includes setting a time and money budget – and sticking to it!

2. CHOOSE A GAME

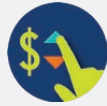

There is a variety of game themes and bet options to choose from at a Charitable Gaming Centre.

3. KNOW WHAT YOU'RE PLAYING FOR

Check the rules section on the game for information on the bingo rules, the prize amounts, symbol combinations and any bonus or extended play features.

Some games offer progressive prizes and other features that may only be available at certain bet amounts. Check the Rules for eligible bets.

4. SET YOUR WAGER

A) Add cash or voucher to load up the cabinet.

B) Select your bet and tap “PLAY” to see if you win. Wins will be automatically added to your balance.

5. CASHING OUT

Had enough fun? Simply hit “cash out” and a voucher will be dispensed. You can then redeem it with a cashier or use it to play on other cabinets.

CAN A TAP 'N PLAY GAME BE DUE FOR WIN?

That would be great, but no, a game doesn't actually become due for a win. All results are based on an unpredictable bingo game outcome.

Since no result can be predicted, you never know when there will be a winning outcome.

PLAYSMART TIP

SET A TIME LIMIT

Give yourself a time limit to play so you don't lose track of time and how much you're spending.

ETIQUETTE

Ready to play? Although they don't increase your odds of winning, good manners make for a good game:

- Players sometimes save their TAP 'N PLAY devices for a quick break. Only do this during less busy times and if the Centre's house rules allow it.
- Play only one device at a time.
- Only sit at a device if you're playing it.
- It's good to keep calm during losses. Remember it's all part of the game, and has nothing to do with the cabinets, the staff, or other players.

PAYOUT

If a game has 88% payout this doesn't mean that if you gamble \$100 you can expect to win back \$88 on an individual session. That's because payout rate refers to the life of the game and all players – not a single player's likelihood of winning for a single bet.

PLAYSMART TIP

For more information on individual TAP 'N PLAY games refer to the rules section on the TAP 'N PLAY game or visit the Customer Service Desk.
